

H.MASTER

QUALITY AND UNIFORMITY THAT GIVE PROFITS

One more important
member of the family

Yoorin[®]
Fertilizantes

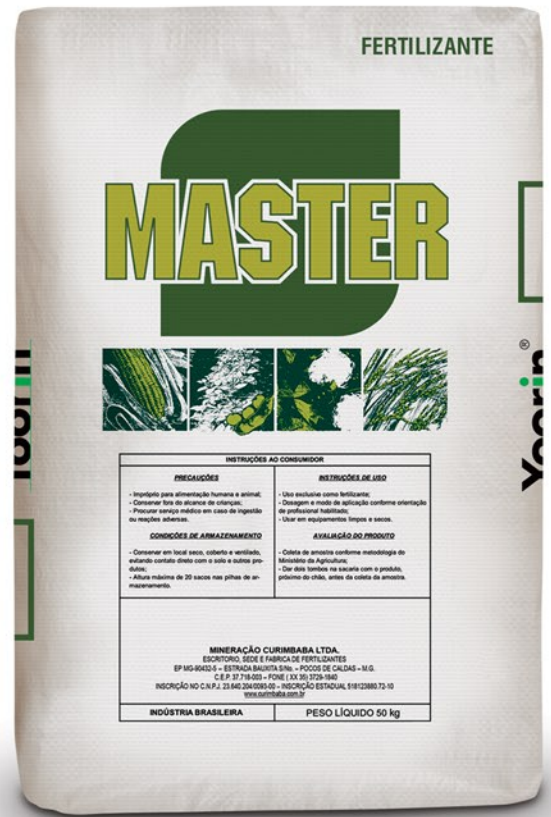

H.MASTER

The newest technology in the fertilizers industry

It was developed from intense research and high technology adoption, the H.Master is a NPK fertilizer, has excellent physical and agronomic properties that increases the crop productivity.

It is produced from selected raw materials, and containing Yoorin and organic matter, the product is rich in humic acid that is responsible for increasing the plants' nutrients absorption. Also, all the substances and the nutrients are inside one grain, offering application uniformity. H.Master is another product with Yoorin quality.

Chemical Composition

Product / Analysis (%)	N Total	P ₂ O ₅ sol. CNA+H ₂ O	P ₂ O ₅ sol. H ₂ O	K ₂ O	Ca	Mg	S	B	Zn	Organic Carbon
H.Master B	4,0	12,0	8,0	8,0	4,0	-	4,0	0,1	-	2,5
H.Master 2	2,0	16,0	10,0	7,0	8,0	1,0	4,0	0,1	-	2,2
H.Master 6	6,0	10,0	7,0	8,0	5,0	-	4,0	0,05	-	3,0
H.Master Max 7	6,0	22,0	18,0	7,0	5,0	-	4,0	0,05	0,4	2,0
H.Master Max 12	6,0	22,0	18,0	12,0	4,0	-	3,0	0,05	0,4	2,0
H.Master 8	8,0	13,0	10,0	12,0	4,0	-	5,0	0,2	0,4	1,0

Mode of Application

Apply on the soil surface, plowed soil or flowerbeds.
