100% NATURAL POTASSIUM FERTILIZER, PRODUCED WITHOUT CHEMICAL PROCESSES

Using our advanced Potassium Line technology, Ekosil® is a premium, all-natural fertilizer produced through a careful milling process. It stands out in the market compared to other products.

K ₂ O Total	8%				
K ₂ O soluble in citric acid 2% (1:100)	1%				
Si Total	25%				
DECLARED ELEMENTS (TOTAL CONTENT)					
Ca	1,0%	Zn	0,01%	Mn	0,15%
Mg	0,15%	Co	0,0004%		

MODE OF APPLICATION:

It is applied directly to the soil, typically by broadcasting, and does not require division into smaller portions. Please consult an agronomist for specific application rates.

ADVANTAGES OF EKOSIL:

Ekosil® is an innovative product that combines the principles of regenerative nutrition and technology to promote the full development of crops.

- ✓ Alkaline product (pH=10.09);
- ✓ Very low salinity index;
- ✓ Completely natural potassium source;
- ✓ Can leave a residual effect for subsequent crops;
- ✓ Single, full-area application;
- ✓ Certified for organic agriculture;
- ✓ Chlorine-free and can improve the quality of agricultural products;
- ✓ Environmentally friendly and promotes soil biological balance;
- ✓ Provides sustained nutrient release;
- ✓ Reduces potassium loss through leaching;
