POTASSIUM, SILICON, AND MICRONUTRIENT-RICH FERTILIZER.

Using our advanced Potassium Line technology, Potasil® is a premium, all-natural fertilizer produced through a careful milling process.

K ₂ O Total	12%				
K ₂ O soluble in tartaric acid 5% + 0,5% NaF (1:500)	3,0%				
Si Total	25%				
DECLARED ELEMENTS (TOTAL CONTENT)					
Ca	0,10%	Zn	0,01%	Mn	0,15%
Mg	0,10%	Co	0,001%		

MODE OF APPLICATION:

It is applied directly to the soil, typically by broadcasting, and does not require division into smaller portions. Please consult an agronomist for specific application rates.

ADVANTAGES OF POTASIL:

Potasil® is a product with a high concentration of potassium and silicon, and a wide range of beneficial elements. Its gradual release meets the needs of crops

- ✓ Chlorine-free, improving the quality of agricultural products;
- ✓ Low salinity index, causing no harm to the root system or soil microbiota;
- ✓ Gradual nutrient release, closely linked to the system's biological activity.
- ✓ Contains silicon, providing numerous benefits to both soil and plants;
- ✓ Certified for organic agriculture.

100% NATIONAL AND NATURAL PRODUCT.
